RE: Application to Supply Goods

Dear Supplier,

Our business is committed to providing our customers with product that is of the highest quality and that complies with the requirements of Good Manufacturing Practices (GMP's) and Good Agriculture Practices (GAP's).

To facilitate the commitment, we have implemented a food safety program that complies with these requirements. This program identifies the potential food safety hazards, introduces measures to control these hazards, and action, where necessary, to control them.

A critical component of this food safety program requires that all suppliers of food, chemicals, and packaging demonstrate that their goods are produced with due care. This includes providing goods with packaging intact, undamaged, clean, clearly labeled, and within temperature control, where appropriate.

Therefore, we ask that you complete the attached application to join our Approved Suppliers List. Once completed, the form should be faxed, emailed, or returned to us at the address below. All information supplied will be held in strict confidence.

We value our business relationship. Upon receiving details of your commitment to a food safety program, we look forward to your assistance in offering our customers the highest possible level of Food Safety.

Sincerely,

Audry Dorsey
